

Curriculum Summary Document Year 10 - Music

Module/Unit of Learning	Taught During	What will students learn?	How does this develop expertise and challenge students?	Links to other Subjects
Exploring the Music Styles	Autumn Term	Students will begin by learning about a variety of musical styles and genres ranging from Classical style music, Electronic Dance Music and Music of the British Invasion. Students will develop their practical abilities and skills performing within ensembles as well as their use of musical technology and DAWs. Students will strengthen their abilities to talk about and write about music and will also expand upon their compositional skills. Students will work on three individual products, focussing on their chosen discipline of either performing of producing. Through these lessons, students will develop a working knowledge of roles within the music industry and understand how different roles and jobs rely upon each other to be successful.	Students will experience all three strands of the music industry – performing, composing and producing. This will challenge students to develop their knowledge and craft expertise in all three strands of music building on the knowledge developed in Key Stage 3. Students will be challenged to create professional music products and will create professional style commentaries to accompany these products.
